

This means more confidence right when you want it most. The **XPAK** reliably detects trace explosives at a price you can afford. It's fast and portable, so it's ready where and when you need it. The sampling baton is optimized to collect from the surfaces you care about hands, vehicles, packages, and baggage. Our proprietary visual detection method eliminates complex electronics so the **XPAK®** is rugged even under tough field conditions. Ready at the flip of a switch no warm-up or calibration required. And with one easy step, you have results that are intuitive.

### **Routine entrance screening**

Quickly sample large numbers of people at entrances to bases, embassies, buildings, power plants, airports, stadiums, events, and facilities.

### **Spot screening**

Randomly screen people and/or their belongings when routine entrance screening is impractical or unnecessary.

### **Vehicle screening**

Screen vehicles at checkpoints or delivery entrances.

### **Screening large numbers of hand-carried items**

Screen luggage, briefcases, bags, and other hand-carried items at airports, bus terminals, and other arrival and departure points.

### **Screening mailed and shipped items**

Screen letters, packages, and shipping crates arriving at embassies, mailrooms, government facilities, or large shipping facilities.

### **Threat-based screening**

Screen small numbers of people, vehicles, unattended packages, or mailed/shipped items in response to a threat.

Information gathering - Gather information about bomb-making activities.
